

JOINT SERVICES RESERVE COMPONENT FACILITY BOARD

FLORIDA

2015 AGENDA

State of Florida
Joint Services Reserve Component Facility Board (JSRCFB)
05 February 2015

1. CONVENING FLORIDA JSRCFB: In accordance with DoD Directive 1225.7, the state of Florida's Joint Services Reserve Component Facility Board meeting convened at 0900 EST, 05 February 2015, in the Alcazar Room located at the Lightner Museum, 75 King Street, Saint Augustine, Florida 32084

2. ATTENDANCE:

LTC Kevin M. Holiday	Florida Army National Guard (FLARNG)
LTC Mark S. Widener	FLARNG
Mr. Brian H. Athon	FLARNG
Mrs. Sandra R. Burchfield	FLARNG
Mrs. Grace E. Ellis	FLARNG
Mrs. Tamara T. Holtz	FLARNG
LTC Britt W. Welch	United States Army Reserve (USAR) – Conference Called In
CPT Christina L. Teagarden	USAR
Mr. William F. Lachicotte, III	USAR – Conference Called In
Mr. Samuel Rasberry	USAR – Conference Called In
Mr. Laz Martin	United States Air Force Reserve (USAFR) – Conference Called In
Mr. Emil Matula	USAFR – Conference Called In
Mr. Raymond F. Garay-Rivera	United States Navy Reserve (USNR)
Mr. Alexander J. Bronakowski, Jr.	USNR – Conference Called In
CWO5 Andrew Souchet	United States Marine Corps Reserve (USMCR) – Conference Called In
Maj Theresa M. Travis	Florida Air National Guard (FLANG) – Conference Called In

3. ACTION ON MINUTES OF PREVIOUS MEETINGS:

a. LTC Kevin M. Holiday welcomed all of the components to St. Augustine, Florida on behalf of LTC Britt W. Welch, United States Army Reserve (USAR), 81st Regional Support Command. The meeting commenced at 0900 EST. A conference line was made available for those unable to attend in person.

b. Previous minutes were presented and accepted by the board.

4. PROJECT SUMMARIES:

a. Number of Projects Reviewed	<u>26</u>
b. Number Recommended for Joint Construction	<u>11</u>
c. Number Recommended for Unilateral Construction	<u>15</u>
d. Number Not Recommended for Construction	<u>0</u>
e. Number of Projects Recommended for Removal	<u>1</u>
f. Number of new projects submitted	<u>1</u>

5. PROJECT LISTING:

a. Project discussion sheets, for each Reserve Component, were reviewed and discussed by the Board Members. Included in the discussion were new, and existing projects previously validated, but not yet under construction. Each Reserve Component presented their individual Component's projects and provided a current status report of each project.

b. A complete list of projects can be found attached.

6. OPEN DISCUSSION: Florida Army National Guard (FLARNG) will be the host for the next Florida JSRCFB 2016 meeting, following the Chairman Rotation Sequence. The next Florida JSRCFB is tentatively scheduled for 04 February 2016. The Host will make the selection of the time and place of the next meeting and inform the Board prior to next year's meeting.

7. ADJOURNMENT: The Board adjourned at 1030 EST, 05 February 2015.

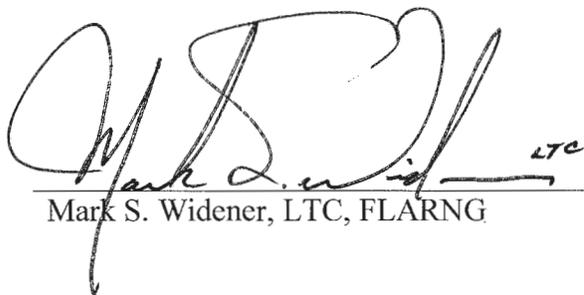

8. AUTHENTICATION: See attachment for signatures of members and/or alternate members present.

DISCUSSION OF EACH PROJECT

PROJECT NO: A (1) United States Air Force Reserve (USAFR)

CONGRESSIONAL DISTRICT NO: 15

PROJECT TITLE: Construct New Maintenance Workshop Complex – Patrick Air Force Base,

DESCRIPTION:

Construct new workshop complex to include survival equipment shop, structural maintenance, corrosion control, machine/welding, NDI shop, accessory flight maintenance section, H-60 phase dock, and associated admin and mechanical areas. Work also includes an outdoor pad for a government-furnished chiller.

(SXHT033003 \$9,200,000.00)

ALTERNATES:

NONE

RECOMMENDED: () **UNILATERAL** or () **JOINT CONSTRUCTION**

RATIONALE:

Existing shops are undersized and spread out in several areas, wasting resources and reducing efficiency. Facilities are not designed for current uses and do not accommodate assigned personnel and required equipment. Personnel must travel between numerous facilities to accomplish required tasks. Machine/welding shop is nonexistent, which prevents filling authorized slots. This type of work must be sent to Homestead AFB for repair or the parts are sent to salvage.

This project would consolidate functions and increase efficiency and save resources.

DISCUSSION OF EACH PROJECT

PROJECT NO: A (2) United States Air Force Reserve (USAFR)

CONGRESSIONAL DISTRICT NO: 15

PROJECT TITLE: Construct New Corrosion Control Facility – Patrick Air Force Base

DESCRIPTION:

Construct new Corrosion Control Facility, 2,215 SM for aircraft corrosion control and washing.

(SXHT043002 \$8,800,000.00)

ALTERNATES:

NONE

RECOMMENDED: () **UNILATERAL** or () **JOINT CONSTRUCTION**

RATIONALE:

Patrick AFB is located in a severely corrosive environment. The 920 RQW currently possesses 14 aircraft which are subject to extreme corrosion problems because of the salt-laden atmosphere. The wing also has over 100 pieces of Aerospace Ground Equipment which require ongoing corrosion control treatment. Other factors present on Patrick AFB that accelerate corrosion include high humidity, solar radiation, condensation and contaminants including sand and dust. All these factors combine to cause conditions which can lead to catastrophic failure of equipment. In addition, a recent hurricane demolished the outdoor aircraft wash rack.

DISCUSSION OF EACH PROJECT

PROJECT NO: A (3) United States Air Force Reserve (USAFR)

CONGRESSIONAL DISTRICT NO: 15

PROJECT TITLE: Construct New Guardian Angel Facility – Patrick Air Force Base

DESCRIPTION:

Mission Impact (U): Current facilities were designed for only 25 Airmen. The new space requirements is 35,517 SF per HAF, AFRC & ACC GA functional guidance. The current facility has increased to 119 Airmen working in 39% of authorized space. The current space does not provide lockers for all operators, radios, and Dive Shop, which makes it difficult to perform routine maintenance. Largely due to lack of space for workbenches and test equipment which creates an operational safety hazards. Expensive UTC equipment is being stored outdoors due to lack of climate-controlled storage This creates costly equipment repairs from the corrosive salty air environment. The current “Parachute Packing Facility” is improperly sized, which limits the training on the parachute packing duties. The new facility would consolidate three facilities to one facility as well as provide adequate parking, and make the new facility efficient and cost effective.

Estimated Cost \$12,000,000.00

ALTERNATES:

Renovation of existing facilities is not economical due to size, age, and location. There are no other facilities in the immediate area that would serve these missions.

RECOMMENDED: () **UNILATERAL** or () **JOINT CONSTRUCTION**

RATIONALE:

Age of facilities exceeds normal facility life cycle. Facilities are totally inadequate and do not meet current design criteria. New facility would meet HAF, AFRC & ACC GA functional guidance and would be much more cost effective.

05 FEB 15

DISCUSSION OF EACH PROJECT

PROJECT NO: A (4) United States Air Force Reserve (USAFR)

CONGRESSIONAL DISTRICT NO: 15

PROJECT TITLE: Construct New Wing Headquarters Facility – Patrick Air Force Base

DESCRIPTION:

Construct a Wing Headquarters facility. Construct multi-story steel frame facility with concrete foundation and floor slab, insulated concrete tile roofing system, CMU or steel stud walls with exterior finish compatible with base architectural standards. Work includes all utilities and communications (conduit and wiring) and the construction of areas for classroom training, administration work, storage, vertical transportation and restrooms. Site work will include pavements, sidewalks, storm water drainage / retention system, landscaping and fencing.

(SXHT973008 \$12,000,000.00)

ALTERNATES:

NONE

RECOMMENDED: () **UNILATERAL** or () **JOINT CONSTRUCTION**

RATIONALE:

The majority of the current 920th Rescue Wing’s functions are located in buildings 559 and 561. These facilities are slated for demolition, are in the clear zone and have mold problems. Various other Wing functions are dispersed across the base. As the 920th grew from a Squadron to a Group and then to Wing status, no consolidation of space was provided. The available space in Bldg. 423 cannot accommodate all of the proposed Wing functions. Furthermore, Bldg. 423 is remotely located from the unit’s operations and maintenance facilities, making command and control of personnel a major issue during Unit Training Assembly weekends. No available space to accommodate all the proposed wing function.

Facility design is complete.

DISCUSSION OF EACH PROJECT

PROJECT NO: A (5) United States Air Force Reserve (USAFR)

CONGRESSIONAL DISTRICT NO: 1

PROJECT TITLE: Construct New Construct Visiting Airmen’s Quarters – Duke Field, Eglin Air Force Base, Auxiliary Field Three

DESCRIPTION:
Construct Visitor Quarters to include private baths, interior hallway entrances into all room, lounge, laundry room, meeting room, business suites, handicapped rooms, storage, and adequate parking areas. Standard masonry construction lodging with steel frame superstructure, concrete foundation and floors, pitched standing seam metal roof, parking lot, covered entrance/drop-off, exterior lighting, enclosed exterior stairwells, electric elevator, fire suppression/ detection, mass notification system, AT/FP, communication and data infrastructure, landscaping, and supporting utilities. Also included will be a lodging office, laundry facility, storage, ice and vending machine areas, lighted lodging sign.

(FTFA 94-9901 – \$9.8M)

ALTERNATES:
Continue to use facilities as is. Although comfortable, they are inadequate in accordance with AFR 90-9. Existing lodging facilities are inside the 80 decibels noise area where the F-35 JSFs are flying on Duke Field.

RECOMMENDED: () **UNILATERAL** or () **JOINT CONSTRUCTION**

RATIONALE:
Adequate temporary lodging is required to support peacetime training of Reserve and Active Duty aircrews, mission support personnel for the 919th Special Operations Wing located at Eglin AFB Auxiliary Field #3, off-base reservists and transient retirees. This facility could also function as additional lodging support for U.S. Army 7th Special Forces Group. Modern, well appointed quarters which will attract and retain competent and skilled personnel are essential. This construction will provide the Air Force standard of a private bath for each sleeping room to be able to compete with off-base commercial Lodging. The Lodging Master Plan and Duke ADP, Lodging needs to be located outside the 75 decibel level to provide proper crew rest.

After FY16, F35 have to be below 75 decibel level.

DISCUSSION OF EACH PROJECT

PROJECT NO: A (6) United States Air Force Reserve (USAFR)

CONGRESSIONAL DISTRICT NO: 1

PROJECT TITLE: Construct New Environmental Management Facility – Duke Field, Eglin Air Force Base, Auxiliary Field Three

DESCRIPTION:

Construct an adequately sized Environmental Management Facility and functionally configured facility at Duke Field required to provide secure, proper and environmentally adequate hazardous material collection and storage. The 2,632 square foot facility shall include male and female latrines, office area, and hazardous material collection/storage areas.

(FTFA061077 \$710,000.00)

ALTERNATES:

Continue to use the space allocated in the 96th LRS Warehouse.

RECOMMENDED: () **UNILATERAL** or () **JOINT CONSTRUCTION**

RATIONALE:

Duke Field is located within one of the test ranges of Eglin AFB. The 919th Special Operations Wing located at Duke Field is responsible to training, readiness, storage equipment and materials, and the overall command and control of the facilities across the base. The hazardous material collection and storage function will continue to operate in substandard conditions in relation to security, space available and environmental protection. Mission readiness could be degraded and potential for environmental compliance discrepancies will continue to exist.

No adequate facilities.

DISCUSSION OF EACH PROJECT

PROJECT NO: A (7) United States Air Force Reserve (USAFR)

CONGRESSIONAL DISTRICT NO: 1

PROJECT TITLE: Construct New Small Arms Firing Range –
Duke Field, Eglin Air Force Base, Auxiliary Field Three

DESCRIPTION: Construct an indoors small arms firing range that meets current Air Force Standards. The range will consist of 21 firing positions and three heavy weapons positions. The CATM facility will provide classroom space, administrative areas, weapons cleaning area, maintenance, weapon, and ammunition storage.

(FTFA 011251 – \$10.2M)

ALTERNATES:
NONE

RECOMMENDED: () UNILATERAL or (X) JOINT CONSTRUCTION

RATIONALE: Duke Field does not have a small arms firing range and Airmen have to travel to alternate Hurlburt Field to receive required small arms training. Scheduling is a big problem. Readiness and training will continue to operate at or below minimum operational levels with continued work around, and increased man-hours. Our SORTS reports will continue to reflect the inability to support homeland defense and contingency deployments.

DISCUSSION OF EACH PROJECT

PROJECT NO: A (8) United States Air Force Reserve (USAFR)

CONGRESSIONAL DISTRICT NO: 1

PROJECT TITLE: Construct New Fire Station –
Duke Field, Eglin Air Force Base, Auxiliary Field Three

DESCRIPTION:
Construct a Fire Station to current Air Force Standards. The Fire & Emergency Services Flight requires a facility that can provide adequate space to house 40 firefighters and 10 pieces of fire apparatus and provide sustained mission support. The facility must incorporate the latest features as identified in the AF Fire Station Design Guide and construction will need to include noise reduction techniques. Include new parking area; and demolish the old Fire Station Bldg 3040 after new facility is constructed.

(FTFA 071123 – \$6.5M)

ALTERNATES:

Continue to utilize the current facility that is small, outdated, and does not meet the AF Fire Station Design Guidelines.

RECOMMENDED: () UNILATERAL or (X) JOINT CONSTRUCTION

RATIONALE:
The existing fire station does not meet Air Force or National Fire Protection Association standard requirements. The existing station is substandard in that it lacks the vehicle stall space required to store/protect mission critical fire apparatus. The Flight has received several new aircraft crash fire fighting vehicles that do not fit (length/width) within existing vehicle stalls. The mission critical vehicles sit outdoors exposed to harsh climatic conditions. There is no way to adequately secure/protect these vehicles during FPCONs.

Changed from Unilateral to Joint Construction. Open for joint efforts

				DATE OF JSRCFB ACTIONS		
VALIDATED:	YEA	<u> X </u>	NAY	27 JAN 11	26 JAN 12	31 JAN 13

DISCUSSION OF EACH PROJECT

PROJECT NO: A (9) United States Air Force Reserve (USAFR)

CONGRESSIONAL DISTRICT NO: 18

PROJECT TITLE: Construct Aircraft Hydrant Dispensing Facility – Homestead Air Reserve Base

DESCRIPTION:

Construct a fuel hydrant system to support fueling of large aircraft at the main ramp. Includes the installation of an above ground storage tank of sufficient capacity to support normal and emergent operations and four on-grade fuel hydrants.

(KYJM 13-9069 - \$16,350,000) USAFR #1 Priority

ALTERNATES:

The project requirements will directly support transiting heavy aircraft and contingency/emergency operations.

RECOMMENDED: () **UNILATERAL** or () **JOINT CONSTRUCTION**

RATIONALE:

Existing fueling operations are supported through over-the-road equipment. This places personnel and equipment under elevated conditions of risk. Additionally, the location of existing stationary fuel facilities on base is vulnerable to incursion or attack.

With a hydrant fuel system, this installation can provide only very limited support for surge missions when called for national strategic priorities. Reference CONPLAN 6150 Humanitarian Assistance/Disaster Relief, CONPLAN 6368 Noncombatant Evacuation Operations, CONPLAN 6400 (classified), and BASEPLAN 6601.

No other component has requirement at this time. Open to Joint effort.

DISCUSSION OF EACH PROJECT

PROJECT NO: B (1) United States Army Reserve (USAR)

CONGRESSIONAL DISTRICT NO: 24 Site has not been identified.

PROJECT TITLE: Construct New Armed Forces Reserve Center/Army Maintenance Support Activity (AFRC/AMSA) – Miramar

DESCRIPTION:

Construct 600 man AFRC/AMSA in Miramar, FL, area. Estimated cost is 30 million dollars. Primary project scope includes approximately 70,000 SF training facility, approximately 30,000 SF Maintenance Building, and approximately 4,500 SF Unheated Storage Building. Project will include supporting facilities such as Privately Owned Vehicle (POV) parking, Military Equipment Parking (MEP), wash rack, security fencing, and access roads. All site utilities and communication requirements will be provided. The project will house all units currently in USAR facilities FL003 (Fort Lauderdale), FL017 (Miami), and FL134 (Miami).

(79353 - \$30M) FYDP: UNP

ALTERNATES:

Renovation of existing – Not feasible or economical due to size, age, location, configuration and lack of expansion room at existing facilities.

Other – There are no other facilities in the immediate area that would suffice for this purpose.

RECOMMENDED: () UNILATERAL or (X) JOINT CONSTRUCTION

RATIONALE:

Age of facilities exceed normal facility life cycle. Existing facilities are inadequate and do not meet current design criteria. Adequate real estate for AT/FP requirements is not available.

This project was briefed to the Army Reserve Construction Requirements Review Committee (CRRC) in August 2014. Project land requirement estimated at 17 acres. Snake Creek Readiness Training Facility in Miramar has been discussed with Florida Army National Guard (FLARNG) as possible site.

DATE OF JSRCFB ACTIONS

REVALIDATED:	YEA	<u> X </u>	NAY	_____	31 JAN 13	06 FEB 14	05 FEB 15

DISCUSSION OF EACH PROJECT

PROJECT NO: B (2) United States Army Reserve (USAR)

CONGRESSIONAL DISTRICT NO: Site has not been identified.

PROJECT TITLE: Construct New Equipment Concentration Site/Army Maintenance Support Activity (ECS/AMSA) Warehouse –

DESCRIPTION:

Construct an ECS/AMSA Warehouse in central or northeast Florida. Estimated cost is 42 million dollars. Primary project scope will include approximately 180,000 SY of military equipment parking, 40,000 SF maintenance building, and 58,000 SF Warehouse. Project will provide all supporting facilities such as privately owned vehicle (POV) parking, wash rack, security fencing, and access roads. All site utilities and communication requirements will be provided.

(12641 - \$42M) FYDP: UNP

ALTERNATES:

Renovation of existing facilities is not feasible or economical due to size and location of existing facilities and lack of available real estate for expansion.

There are no other facilities in the region that would meet this requirement. Current storage capacity is in other states and requires excessive travel. Air conditioned is required to store and repair service.

RECOMMENDED: () UNILATERAL or (X) JOINT CONSTRUCTION

RATIONALE:

This project was briefed to the Army Reserve Construction Requirements Review Committee (CRRC), August 2014. Land requirement for this project is estimated at 45 acres. In January 2015, there was a joint meeting with USAR, Florida Army National Guard, and Camp Blanding Joint Training Center's Master Planning to discuss options for this project. Presently the USAR has to travel excessive distance for storage and equipment repair of military equipment.

05 FEB 15

DISCUSSION OF EACH PROJECT

PROJECT NO: E (1) Florida Army National Guard (FLARNG)

CONGRESSIONAL DISTRICT NO: 6

PROJECT TITLE: Construct New Readiness Center – Palm Coast/Flagler County

DESCRIPTION:

Construct a new FLARNG Readiness Center for Headquarters Battery, 1-265th ADA and Company C 1-265th ADA. This project is due to relocating unit(s) from existing Armed Forces Readiness Center located at Daytona Beach, Volusia County. Relocation is required due to lack of suitable property. This facility will provide 64,721 (+) SF of primary administrative space for offices, assembly area, training, and storage areas for approximately 253 personnel. Outside supporting facilities include military and civilian vehicle parking, fencing, sidewalks, access roads, facility sign, vehicle wash platform, and flagpole. Physical security measures for anti-terrorism and force protection will be incorporated into the design to include maximum feasible standoff distance. The total area requested is the minimum essential space required to support unit combat and peacetime readiness. The proposed project is on a parcel with 35 buildable acres. The property is located in Palm Coast, Flagler County adjacent to the Flagler County Airport. Proposed facility is 100% designed.

NGB PROJECT NO: 120173

Federal Cost: \$18,000,000.00 State Cost: \$0

ALTERNATES:

Renovation of existing facility is not economically feasible due to size, age, location, available real estate, and configuration. The long-term license has expired (December 2013). However, the City of Daytona Beach has agreed to lease the current facility for an additional five years. There are no other facilities in the immediate area that would suffice for this purpose and a long-term lease renewal is not acceptable to the property owner.

RECOMMENDED: () UNILATERAL or (X) JOINT CONSTRUCTION

RATIONALE:

Current facility dates from the 1960s. The facility is inadequate in all areas and does not meet current criteria nor is there adequate real estate. All current working systems are also inadequate creating a high risk relative to life/safety measures. Also the encroachments of development and water management requirements have eliminated renovations as an alternative. Unit readiness will continue to degrade if this project is not accomplished.

Open to Joint Construction.
FLARNG's Priority #1 on the Long Range Construction Plan.

DISCUSSION OF EACH PROJECT

PROJECT NO: E (4) Florida Army National Guard (FLARNG)

CONGRESSIONAL DISTRICT NO: 3

PROJECT TITLE: Construct New Special Forces Centric Training Complex –
Camp Blanding Joint Training Center (CBJTC)

DESCRIPTION:

Construct a new FLARNG training complex for Headquarter, Headquarter Detachment, Support Company and Forward Support Company, 3-20th SFG (A). This facility will provide 69,559 SF complex of primary administrative space, assembly area, training, and storage areas for approximately 285 personnel. Outside supporting facilities include military and civilian parking, fencing, sidewalks, access roads, facility sign, vehicle wash platform, fuel storage and dispensing system, and flagpole. Physical security measures for anti-terrorism and force protection will be incorporated into the design to include maximum feasible standoff distances. Energy conservation measures will also be incorporated into design where feasible. The total area requested is the minimum space required to support unit combat and peacetime readiness objectives.

NGB PROJECT NO: 120208

Federal Cost: \$31,447.00

State Cost: \$10,483,000.00

ALTERNATES:

Continue to use inadequate facilities. There are no other facilities in the immediate area that would suffice for this purpose.

RECOMMENDED: () **UNILATERAL** or () **JOINT CONSTRUCTION**

RATIONALE:

These units are currently housed in an annex of several simple concrete block buildings that constitute less than 11% of its authorization. This composite annex is inadequate to fully support the units due to the lack of adequate classrooms and training areas, equipment storage, administrative space, drill hall, kitchen, and locker rooms. Moreover, the current annex lacks several facilities to support these specialized units unique training requirements associated with parachutes, weapons, scuba, simulations, and vehicles.

FLARNG's Priority #4 on the Long Range Construction Plan.

DISCUSSION OF EACH PROJECT

PROJECT NO: E (5) Florida Army National Guard (FLARNG)

CONGRESSIONAL DISTRICT NO: 3

PROJECT TITLE: Construct New Operational Readiness Training Complex (ORTC), Phase One – Camp Blanding Joint Training Center (CBJTC)

DESCRIPTION:
Construct a new FLARNG training complex for Headquarter, Headquarter Detachment, Support Company and Forward Support Company, 3-20th SFG (A). This facility will provide 69,559 SF complex of primary administrative space, assembly area, training, and storage areas for approximately 285 personnel. Outside supporting facilities include military and civilian parking, fencing, sidewalks, access roads, facility sign, vehicle wash platform, fuel storage and dispensing system, and flagpole. Physical security measures for anti-terrorism and force protection will be incorporated into the design to include maximum feasible standoff distances. Energy conservation measures will also be incorporated into design where feasible. The total area requested is the minimum space required to support unit combat and peacetime readiness objectives.

NGB PROJECT NO: 120217

Federal Cost: \$10,000,000.00

State Cost: \$0

ALTERNATES:

Continue to use inadequate facilities. The renovation of existing facilities is not economically feasible. There are no other facilities in the immediate area that would suffice for this purpose.

RECOMMENDED: () **UNILATERAL** or () **JOINT CONSTRUCTION**

RATIONALE:

Camp Blanding Joint Training Center does not have the required facilities to house, feed, and training a brigade size element. Currently, CBJTC improvises to meet the requirements by renting large, circus type tents for billeting and administrative functions, latrine and shower trailers, generators and light stands. The cost is borne by OPTEMPO funds.

FLARNG’s Priority #5 on the Long Range Construction Plan.

DISCUSSION OF EACH PROJECT

PROJECT NO: E (6) Florida Army National Guard (FLARNG)

CONGRESSIONAL DISTRICT NO: 3

PROJECT TITLE: Construct New Unmanned Aircraft System Operating Facility (UASOF) –
Camp Blanding Joint Training Center (CBJTC)

DESCRIPTION:

Construct a new Unmanned Aircraft System Operating Facility (UASOF) for TUAS Plt, 53rd BSTB. This facility will provide 11,345 SF complex of primary administrative space and training, and storage areas for approximately 33 personnel. Outside supporting facilities include military and civilian parking, fencing, sidewalks, access roads, taxi and run ways, facility sign, and flagpole. Physical security measures for anti-terrorism and force protection will be incorporated into the design to include maximum feasible standoff distances. Energy conservation measures will also be incorporated into design where feasible. The total area requested is the minimum space required to support unit combat and peacetime readiness objectives. This project is proposed on 15.0 acres.

NGB PROJECT NO: 120225

Federal Cost: \$7,000,000.00

State Cost: \$0.00

ALTERNATES:

Continue to use inadequate facilities. There are no other facilities in the immediate area that would suffice for this purpose, and a long-term lease is not acceptable due to the unavailability of future long-term lease dollars.

RECOMMENDED: () **UNILATERAL** or () **JOINT CONSTRUCTION**

RATIONALE:

There is no existing space at the current airfield to house the UASOF or the assigned personnel. The unit will need a runway and training space to properly train for its mission. The UASOF must be operated in military “restricted” airspace and CBJTC has such space available. The space will permit modern, cost-effective, energy efficient training, and sustainment operations that will improve the unit’s readiness posture.

FLARNG’s Priority #2 on the Currently Unfunded Requirement.

DISCUSSION OF EACH PROJECT

PROJECT NO: F (1) United States Navy Reserve (USNR)

CONGRESSIONAL DISTRICT NO: 1

PROJECT TITLE: Renovate Navy Operational Support Center (NOSC) – Pensacola

DESCRIPTION:

Repair Building Number 781-0 to permit relocation of the Navy Operational Support Center (NOSC) from their current location at Saufley Field, to Naval Air Station (NAS), Pensacola.

(P797 - \$8,050) Unprogrammed

ALTERNATES:

Original options for drill hall included use of existing auditorium space onboard NAS Pensacola. Scheduling and use of these spaces have been determined too difficult, due to tempo of training evolutions and graduations for the many supported aviation commands onboard NAS Pensacola.

RECOMMENDED: () **UNILATERAL** or () **JOINT CONSTRUCTION**

RATIONALE:

Location at this site provides an optimum training platform for the NOSC. Movement from Saufley Field is required due to Navy Enhanced Use Lease of OLF Saufley.
